

THE CONQUISTADOR Portable Wheel Corral

“ — WHY THE CONQUISTADOR? ”

At the end of the day,
my **bottom line increases**
when I can **lessen the**
stress on my herd and
save time, too.

CHAD WALKER,
Walker Ranch, Texas

Design Details That Make A Difference

- ✓ Steel wheels never go flat
- ✓ Dual-spindle design for more payload capacity
- ✓ Rear receiver hitch to tow chutes easily
- ✓ Solar-powered hydraulics are always ready
- ✓ Two sets of palp cages for headgates or chutes
- ✓ Proudly made in America with domestic steel
- ✓ Perfect for ranchers ready to grow their herd

Safety Triple Threat

Traveling with a wheel corral has never been safer - all models come standard with **dual tires** (and a spare!) as well as **lights** and **brakes**. Road reliable at highway speeds.

Time is Money

Every rancher has more chores than hours in the day. Work your herd with less labor. Easy to haul, set up, and take down. **Ready for cattle on site within 30 minutes.**

Process More Cattle, Comfortably.

Prime & Choice models are able to process a minimum of 195 cow/calf pairs easily. Cattle are always centered through the dual-adjust alleyway with sheeted sides.

MAXIMIZE GAINS

IMPROVE CATTLE HEALTH WHILE REDUCING SHRINK

EXAMPLE

HERD SIZE: 1000 HEAD

AVERAGE WEIGHT: 800 LBS

AVERAGE PRICE: 1.37/LB

- Strategic Implants - 20 lbs. (\$27.40/head)
- Deworming - 20 lbs. (\$27.40/head)
- Reduce shrink anywhere from 3-6% vs. using poor facilities or shipping to a facility to be worked.

\$54.80/head additional profit
x 1000/head

\$54,800 is \$3,200 more than the cost of The Conquistador Prime Model.

SCAN ME

Scan to learn more about the advantages of a strategic implant schedule.

“

You're able to get a 25 lb advantage from implants and a 25 lb advantage from parasiticides...giving you an additional 50 lbs. overall.

John Hutcheson, PhD, MERCK Animal Health

”

“

"The ability to work cattle in an environment in which they are familiar allows for the cattle to express normal behavior and helps to reduce fear and distress.

While these are basic standards of animal welfare, they clearly translate to the animal's ability to **convert more energy into weight gain due to decreased stress.**

Dr. Tera Barnhardt, DVM, Kansas
